

Follow the following steps (or any other equivalent):

1- push the stone in the top right

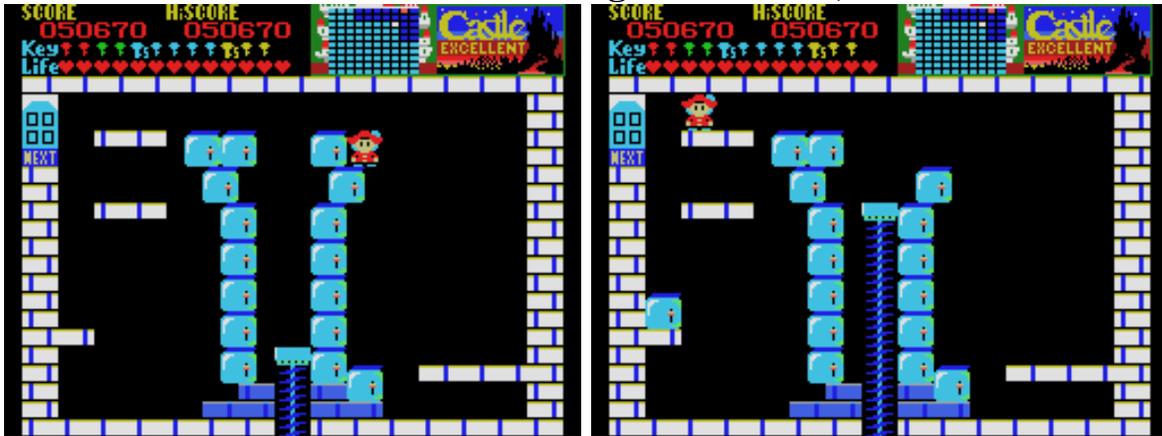

2- shift all stones of the left column half distance

3- make a stone-bridge like the following one

4- start to transfer stones from the right to the left, one after another

5- after you transfer the 2<sup>nd</sup> stone, don't forget to take the 3 light-blue keys

6- now, continue till you get a total of 5 stones above each other to open the door...
